### Reference for Bramy Serwis

Dear Sir or Madam,

With this letter I would like to thank you for the wonderful cooperation, and the fast and uncomplicated contacts.

In the case of the hardware fault of our door drives, the manufacturer advised us to replace them with new and very expensive ones. In the search for alternatives, we came across the online presence of Bramy Serwis. The contact with Mr. Kaszkowiak was more than uncomplicated and an answer was not long in coming. The defective door drives were then sent in for repair. A little later, we received the information about the receipt of goods and the constant state of recovery. The return delivery took place before the agreed time and the door drives were expected to be fully functional. The cost of repair was only a fraction of that of a new component.

We will gladly make use of your service and can recommend you very well.

With best regards

Stefan Stich
