To Whom it may Concern.

Dear Sir

Re: Jacek Tuz

Jacek Tuz has been an Instructor with the McKenzie Institute International since 2009. He has been licensed to teach the McKenzie Institute's educational program since that time. The Institute's Educational program consists of a series of four courses, each of 28 hours, with the aim of providing post graduate education to clinicians who treat musculoskeletal conditions. He has taught a minimum of 10 courses annually since 2009 and the average number of course participants is has been 12. Hence he has considerable teaching experience.

The content of the Institute's educational program focuses on the assessment and management of Musculo skeletal disorders with an emphasis on self management strategies and prevention. Whilst the courses are designed for clinicians who treat Musculo-skeletal disorders a significant portion of the information is applicable to the general public and to industry.

I would recommend him for the role of training employees in the field of ergonomics and occupational hygiene of the musculo-skeletal system.

Yours sincerely

Helen Clare
Chief Executive Officer.
