

LETTER OF RECOMMENDATION

Lublin, September 2024

To whom it may concern,

On behalf of Asseco Business Solution, I would like to express the benefits while working with Tomasz Cholewa (Cloudowski).

Tomasz conducted a dedicated training program on Kubernetes for our employees. His passion and commitment helped our developers gain new knowledge and understanding how to use this technology in our projects. The program was specifically tailored to the company's environment and aligned with the tools and practices used in the participants' daily work.

During the training, he was energetic, passionate and engaged throughout the whole multi-week program. His insights and expertise on the subject were very helpful in understanding even the most complex of the inner workings of Kubernetes.

It is our pleasure to recommend Tomasz Cholewa as a professional trainer providing high standard services for the benefit of their clients. We strongly believe that his support represents a great mark within Asseco Business Solution and we will definitely look forward to further collaborations.

Sincerely yours,

Robert Brytan  
Director of Data Center
