

***Dear Sir/Madam,***

*As the owner of **r<sup>2</sup>eko Artur Owczarek**, a company specializing in environmental protection in a broad sense, I would like to introduce myself and my company more closely, believing that I can offer you and your employees substantive support in the challenging field of environmental protection. Support that is of the highest global standard.*

*For over 15 years, I worked at the Department of Inspection of the Regional Inspectorate for Environmental Protection in Łódź, starting my career as an Inspector and ultimately serving as the Director. When I left the Regional Inspectorate for Environmental Protection in Łódź, I had conducted over a thousand inspections of economic entities, carrying a wealth of valuable professional experiences.*

*Simultaneously, for more than 15 years, I have been an environmental auditor focusing on greenhouse gas emissions. I had the opportunity to audit the largest installations in Poland, and the total number of audits exceeded a thousand.*

*The professional experience gained in both public administration and the private sector as a GHG auditor led me to establish my own business providing environmental outsourcing services at the highest possible level - respecting environmental regulations from both the entrepreneur's and the official's perspective.*

*Currently, I carefully select employees, ensuring that their knowledge and professional experience guarantee high-quality services provided by r<sup>2</sup>eko Artur Owczarek. Our team consists of individuals with administrative, corporate, engineering, and project experience. We also have members from outside Poland who contribute valuable input to our company's portfolio.*

*When collaborating with clients, we always strive to get to the heart of the problem to solve it quickly and effectively, in full compliance with the applicable laws. A satisfied client brings us true satisfaction.*

*As a company, we are able to offer you a wide range of environmental services, from environmental outsourcing and environmental audits for your company and subcontractors to substantive support, preparation of all possible environmental documentation, and concluding with specialized training sessions.*

*All our environmental services and reports can be provided in Polish, English, French, and Arabic. This well-prepared environmental documentation, especially regarding the carbon footprint of the entity or product, carbon neutrality, and sustainable development of your company, remains crucial when establishing business relations outside of Poland – within Europe or even beyond its borders, and attests to our company's high level of environmental responsibility.*

*Attached to this cover letter is our company's portfolio, including selected environmental topics. If any of our services pique your interest, I invite you to contact us by phone or email. I would be pleased to talk or meet with you to discuss the possibilities and potential cooperation in detail.*

*Yours sincerely,*

*Artur Owczarek*
